

UiPath Attended Robots

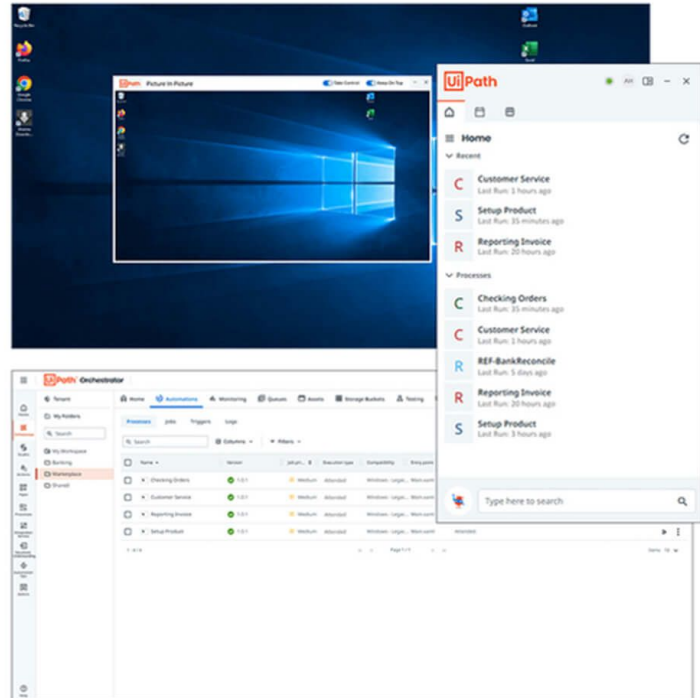

Attended Robot

Attended robot is the robot that work side by side with humans, in the same machine. They work triggered by user interaction and will respond exclusively to user requests. In other words the attended robot can be called end user's personal assistant. So people get a lot more done with a lot less stress. The result is a better employee experience and continuous growth for your business.

86% of employees are willing to use automation tools

Build, deploy, and govern Attended Robots that are suitable for any role and work style:

- Make it easy-and fun-to work with Attended Robots
- Deliver intuitive automation experiences-with no disruption to employees' workflows
- Enable employees to easily communicate with robots
- Manage and measure at scale without fail

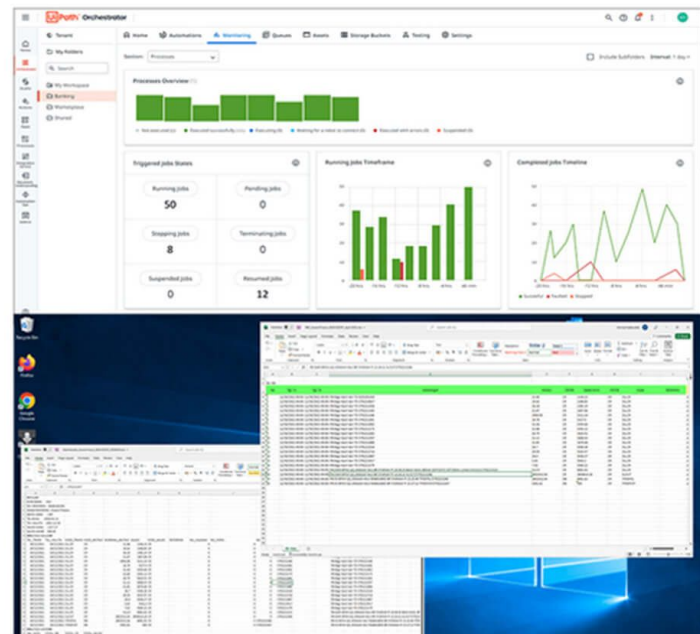

UiPath Robots

Unattended Robot

Unattended Robot is the robot that runs with less human intervention, usually run on a separate machine. Unattended Robot can work independently follow the rules and work by timing trigger or by queue trigger. Usually, they will contact the user if there is a question or an error occurs.

Why Use Unattended Robot?

- Reduces operating costs
- Increases productivity
- Eliminates errors
- Frees employees from repetitive work
- Improves compliance

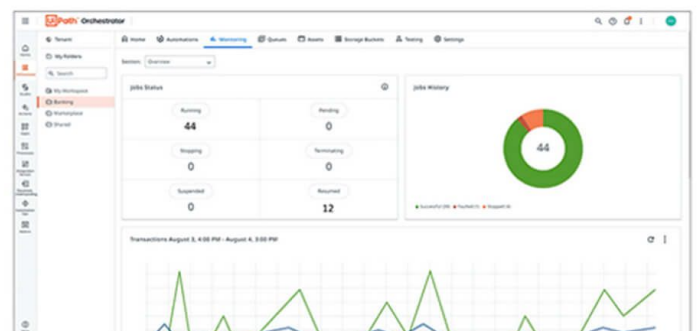

UiPath Orchestrator

Monitoring with Orchestrator

True enterprise-grade automation requires rich, powerful orchestration. UiPath Orchestrator gives you the power you need to provision, deploy, trigger, monitor, measure, and track the work of attended and unattended robots-so your entire digital workforce is secure and productive.

Bring down the Total Cost of Ownership

With zero-touch provisioning, pluggable enterprise credential stores, OAuth 2.0 authorization for third party apps and the power to deploy processes simply by adding users to Active Directory groups, scaling automation won't tax your operations-or your operating budget.

Keep compliant with a complete audit trail

Orchestrator tracks and logs everything every robot does, along with everything people do with robots, so you can keep compliant and secure. Drill-down dashboards and UiPath Insights give you full visibility from deployment to ROI.

Open up great connections

Orchestrator lets you integrate with software and third-party products, gives you a range of deployment options, and brings you into a huge global RPA community and the UiPath Marketplace.

Easy access to all your enterprise automation

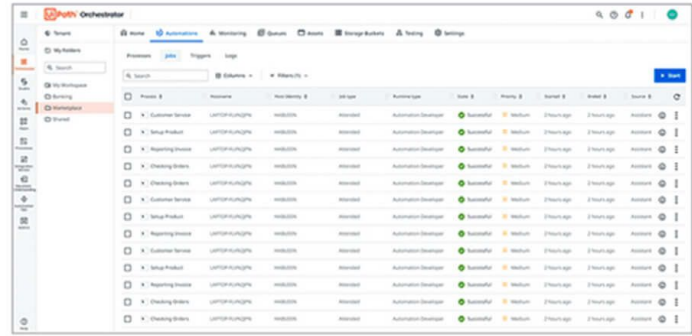

The new Orchestrator user interface is more compact, contextual, and intuitive. Get everything done faster-and give your mouse a break.

Cloud native deployment flexibility

Try UiPath Orchestrator instantly as SaaS from the UiPath Automation Cloud™ or on-premises, in virtual machines, in private or public cloud, Linux VM or as a cloud native single containerized suite via UiPath Automation Suite.

Orchestrate on the go

Securely monitor your robot workforce, get alerts and take action from anywhere with Orchestrator Mobile for iOS and Android.

Automation Solutions

Automation for banking and financial services

Use RPA and RPA + AI to improve processes, performance, and profitability all over your financial institution.

Strip out inefficiencies and errors in processes that move across systems, software, and apps. Deploy AI and digital solutions more quickly. Respond smoothly to new demand surges. With such a powerful way to drive efficiency, deliver better service to customers and clients, and de-stress your employees, it's time to go long on automation.

Automation solutions for healthcare

Spend more time on work that matters with healthcare automation.

When software robots take on the thousands of detailed, repetitive tasks and processes, it makes everyone in the healthcare system-patients, partners, caregivers, administrators, and communities-feel a whole lot better.

Automation solutions for the insurance industry

Streamline operations with insurance automation.

From sales to underwriting to servicing to claims management and beyond, RPA and RPA + AI can improve insurance operations' agility, speed in response time, and get customer-facing digital capabilities up and running faster.

Automate your HR department end-to-end industry

HR automation helps People Teams be more efficient and deliver faster.

Transform your total employee experience with HR automation.
